- **If a player loses a round:** They tend to move to the gesture that *would have beaten* what just defeated them. (e.g., if their Scissors lost to Rock, they will likely toss Paper in the next round).

Understanding this cycle allows a sharp gambler to expect the opponent's next move based solely on the outcome of the previous round.

2. The Psychology of "Rock"

Novices and casual players overwhelmingly prefer **Rock** in the really preliminary of a match. Emotionally, Rock feels like a strong, aggressive, and safe opening option. Knowing this, a skilled RPS bettor will frequently open with **Paper** in round one, taking advantage of the opponent's natural bias towards the heaviest hand.

3. Verbal Priming and Tells

In live settings or video-chat gambling environments, opponents often leak information through spoken cues or physical micro-expressions.

- **Subliminal Priming:** Casually discussing a shape in discussion simply before the toss (e.g., "*I feel like burying this game*" or "*That was as clear as paper*") can unconsciously affect the challenger to pick that specific item.
- **Physical Tells:** Watch the opponent's hand tension. A firmly closed fist normally suggests Rock, while a loose, relaxed hand often precedes Paper.
