

A garden maintenance enquiry should identify the areas and tasks you want discussed. A general request to look after the yard can otherwise mean different things to different people.

Describe the areas

Use photographs or a sketch to show the garden beds, lawn or other parts included in the enquiry. Identify features you want considered [landscape design planning](#) without assuming that every kind of work belongs in a single service description.

List the tasks separately

Explain what you currently handle and which tasks you want help assessing. Distinguish routine work from a possible change to the garden. Ask how the proposed service would describe its included tasks and any work considered separately.

Keep the agreed record

Clarify access arrangements, communication and how a change to the work would be discussed. Save the current scope with the proposal. Use it when asking questions about later visits instead of relying on a broad label for the service.

R & G Almanza Landscape Inc provides landscaping and landscape design services.

Keep the next decision clear

Revisit the intended use before adding another feature to the discussion. Explain what the addition would accomplish and ask whether it changes preparation, access, maintenance or any earlier selection.
