As soon as a round begins, the airplane releases into the sky. As elevation increases, so does the coefficient multiplier. Gamers need to by hand trigger their "Eject" or "Cash Out" action before the flight ends. If successful, the player's stake is increased by the precise coefficient at the minute of withdrawal. If the aircraft disappears before squandering, the stake is lost.

Secret Gameplay Variables

To provide players a better structural understanding, the following table lays out the primary aspects come across throughout a standard session of Avia Masters:

Element Description Effect on Gameplay **Multiplier Coefficient** The mathematical value that grows as the flight ascends (e.g., 1.2 x, 5.0 x, 50x). Directly determines the payment potential based on the initial stake. **Fuel Gauge** Represents the operational limit of the chosen aircraft. Presents an optimum flight period restraint per round. **Weather condition Hazards** Random atmospheric conditions (e.g., turbulence, headwinds).
