Browsing UK Safety Standards

When buying a bunk bed in the UK, safety is vital. Unlike standard single beds, bunk beds bring inherent threats related to height and climbing. For that reason, purchasers need to guarantee that any item they purchase abide by extensive British and European safety legislation.

What to Look For:

1. **British Standards (BS):** Ensure the bed complies with **BS EN 747**, the European safety standard for bunk beds and high beds. This controls structural stability, entrapment threats, and guardrail heights.
2. **Guardrail Height:** The top bunk needs to include security guardrails on all sides, standing a minimum of 160mm above the bed mattress surface area to prevent nighttime falls.
3. **Ladder Design:** Ladders needs to be tough, securely repaired to the frame, and ideally feature large, flat steps rather than round rungs for much easier climbing.
4. **Matress Depth Warnings:** Manufacturers always specify a maximum mattress depth for the leading bunk to make sure the guardrail stays reliable. This guideline needs to be strictly followed.
