What is the Aviator Game?

At its core, Aviator is a social multiplayer casino game coming from the "crash game" category. Unlike conventional casino video games where players spin reels or bet a dealer in real-time cards, Aviator includes a rapidly ascending plane.

As the airplane removes, a multiplier coefficient begins to rise-- beginning at 1.00 x and possibly reaching infinity. The goal is deceptively simple: gamers put a bet before the round starts, view the plane ascend, and hit the **"Cash Out"** button before the aircraft randomly flies Aviator away. If a player successfully squanders before the crash, they win their preliminary stake increased by the current multiplier. If the airplane flies away (crashes) before they squander, the bet is lost.
