What is Plinko Crypto?

Plinko is a game historically popularized by the renowned television game show *The Price Is Right*. As gravity pulls the disc downward, it bounces arbitrarily off the pegs until it finally settles into among numerous slot multipliers at the bottom.

When adapted for the crypto ecosystem, Plinko went through a digital change. Instead of fiat currency, gamers bet cryptocurrencies like Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), or Tether (GBPT). Additionally, modern crypto casinos incorporate **Provably Fair** algorithms, ensuring that every single drop is mathematically random and proven by the gamer.

 - **High Risk:** The center slots result in heavy losses, but the extreme outer slots offer huge, life-altering multipliers.
2. **Row Counts:** Players can change the size of the pyramid, normally ranging from 8 to 16 rows. More rows mean a wider board, higher prospective maximum payouts, and a lower probability of hitting those extreme external slots.
3. **Bet Sizing:** Wagers are placed in fractional amounts of cryptocurrency, accommodating both casual players and high rollers.
