The Ghost system likewise includes a "ghost-mode" that can be activated when an automobile is parked for prolonged durations. In this mode the immobiliser momentarily disables the starter while still allowing regular operation of lights, climate control and alarms, therefore lowering battery drain.

2. Why Choose Mobile Fitting?

Historically, immobiliser installation needed a trip to a garage, which might involve:

1. Scheduling an appointment that fits the owner's calendar.
2. Possibly leaving the car at the workshop for several hours.
3. Dealing with unknown service technicians and differing quality of workmanship.

Mobile fitting services resolve these pain points by bringing the installer to the client's doorstep-- whether in your home, the office, or a parking area. The advantages are measurable:

- **Time Efficiency**-- Most setups are completed in 45-- 60 minutes, compared with 2-- 4 hours at a standard garage.
- **Flexibility**-- Technicians run on a 7-day schedule, frequently offering early-morning or late-evening slots.
- **Openness**-- The owner can view the process, ask concerns in genuine time, and validate that the gadget is truly hidden.

- **Lowered Risk of Damage**-- Since the service technician works on-site, the vehicle is stagnated or lifted on a lift, limiting direct exposure to unexpected scratches or dents.
