2. **Introduce the Aircraft:** Once the round starts, the airplane takes off, ascending vertically or diagonally throughout the screen.
3. **Collect Multipliers:** As the plane climbs up, it encounters numerous multipliers, stars, and fuel products drifting in the airspace. Travelling through these items increases the total payout for the round.
4. **Manage Fuel:** The airplane operates on a limited fuel supply. Every second in the air consumes fuel, and players should gather fuel refills to keep the flight going.
5. **The Conclusion:** The round ends when the aircraft either runs out of fuel and descends, or successfully finishes its flight path. The goal is to squander or accumulate the highest possible multiplier before the flight ends.
