Traditionally, opening a case in CSGO was a singular affair: you purchase a secret, open a case, and hope to the RNG (Random Number Generation) gods for a knife or hidden skin.

Case battles revolutionize this principle by introducing multiplayer competitors. On a case battle site, 2 or more gamers pool their resources to open the specific same cases simultaneously. The guidelines are basic:

2. **The Opening:** Everyone opens the picked cases in genuine time.
3. **The Payout:** At the end of the battle, the total worth of all the skins stopped by all gamers is computed. **The player (or team) who opened the greatest overall skin value wins the whole lot.**

If you win, you win not just your own drops but also the drops of your challengers. If you lose, you lose everything you take into the battle.
