How to Play Limbo: A Step-by-Step Guide

Playing Limbo requires extremely bit a priori understanding, making it exceptionally accessible to beginners. Here is how a basic round works:

1. **Set the Bet Amount:** The player decides just how much money (or cryptocurrency) they desire to wager on the upcoming round.
2. **Pick a Target Multiplier:** This is the core of the game. Players input their desired multiplier. This can be as low as 1.01 x or as astronomically high as 1,000,000 x, depending upon the specific casino's limitations.
3. **Check the Win Chance:** As the player adjusts the target multiplier, the game automatically computes the mathematical probability of winning. A lower multiplier yields a high win opportunity, while a huge multiplier results in a fractional win chance.
4. **Struck "Bet" or "Play":** The round starts immediately. A digital number rolls, and the outcome is revealed in milliseconds.

- **The Goal:** Accumulate small, constant wins over time.
- **The Risk:** A single loss can erase the profits collected from a number of previous winning rounds.

2. The Martingale System (Aggressive)
