Factors to Consider When Choosing an Auto Shipper

When selecting an auto shipper in Suffolk, there are several factors to consider. Choosing the right service will ensure that your vehicle arrives in a timely manner, without any damage, and at a reasonable cost. Here are the key factors to keep in mind:

- **Experience:** Look for a shipping company with years of experience in the auto transport industry. The longer a company has been in business, the more likely they are to provide reliable service.
- **Reputation:** Research online reviews and ask for recommendations from friends or colleagues who have used auto shipping services. A good reputation is a strong indicator of quality service.
- **Services Offered:** Ensure the company provides the type of transport you need (open or enclosed) and check if they offer additional services such as door-to-door delivery or expedited shipping.
- **Insurance Coverage:** Make sure the company offers adequate insurance coverage in case of any damage during transport.
- **Pricing:** Get quotes from multiple companies to ensure you're getting a fair price for the services offered. Avoid companies that offer unusually low rates, as this may indicate subpar services.

How to Prepare Your Vehicle for Shipping

Before your vehicle is picked up for transport, there are a few steps you can take to ensure the process goes smoothly:

1. **Clean Your Vehicle:** A clean car is easier to inspect for pre-existing damage. It also allows the auto shipper to take accurate photos of your vehicle.
2. **Remove Personal Belongings:** Auto shippers are generally not allowed to transport personal items in the car. Make sure your vehicle is empty, except for the essentials needed for the transport.
3. **Check for Leaks:** Ensure your vehicle doesn't have any fluid leaks, as this can cause problems during transit.
4. **Document Existing Damage:** Take photos of your vehicle before shipping to document its condition. This will help in case of a dispute about any damage that may occur during transport.
5. **Ensure Your Vehicle is Operational:** Make sure your car is in running condition, with enough fuel to be driven on and off the transport carrier.
