At its core, Aviator is a social multiplayer crash game. The central style revolves around an increasing multiplier curve that can "crash" at any minute.

When a round begins, a red aircraft takes off, and a multiplier coefficient starts rising quickly from **1.00 x**. The objective is stealthily easy: players need to cash out their payouts before the airplane flies away. If a gamer squanders successfully, their bet is increased by the coefficient at the time of the cash-out. Nevertheless, if the airplane flies away before they cash out, the bet is lost.

3. **Squander:** Players should keep track of the increasing multiplier and click the **"Cash Out"** button before the plane disappears off the screen.
