What is Crash Gambling?

At its core, crash betting is a multiplayer, online betting video game centered around an escalating multiplier. Gamers put a bet, and as the round begins, a multiplier curve starts to rise-- beginning at 1.00 x and in theory climbing up definitely.

The goal is easy: **squander before the video game randomly "crashes."**

If a gamer effectively squanders at 2.50 x, they double their wager (minus a tiny house edge). However, if the game crashes before they squander, they lose their whole bet for that round. The twist is that crashes can happen at any millisecond-- in some cases quickly at 1.00 x, and other times soaring past 100x and even 1,000 x.

A Typical Round: Step-by-Step

1. **The Betting Window:** Players have a short window (typically 5 to 10 seconds) to place a couple of bets for the upcoming round.
2. **The Lift-Off:** The round starts. A rocket, line, or visual multiplier begins to rise from 1.00 x up.
3. **The Decision:** Players see the multiplier climb in genuine time, making a split-second choice to click "Cash Out" to lock in their current earnings.
4. **The Crash:** Suddenly, the game stops. A "Crashed at X.XX" message appears. Anybody who had not squandered loses.
