In a specialized studio developed to simulate a high-end VIP casino room, a human dealer handles a physical blackjack table using real cards and chips. Advanced cams catch every shuffle, deal, and card expose in crystal-clear HD. This video feed is streamed in real-time to the player's gadget-- whether it's a home computer, tablet, or mobile phone.

Gamers put bets using a digital interface on their screens, while the physical actions of the dealer are equated into digital information by means of sensors and OCR technology. This enables gamers to hit, stand, double down, or split effortlessly, mirroring the flow of a standard game.
