How Odds Are Calculated

Rarity Tier	Approximate Drop Rate (%)
Common	70.0
Uncommon	20.0
Unusual	7.5
Mythic	2.0
Legendary	0.5

Keep in mind: Exact likelihoods can differ by title and might be changed by the publisher in time.

In physical secret boxes, makers frequently divulge a "guaranteed value" for each tier, but the exact circulation of products is regularly kept private. Consumers need to treat any case-opening purchase as a kind of home entertainment rather than an investment.

Economic Impact: Value versus Cost

Direct Purchase vs. Case Opening

Element	Direct Purchase	Case Opening
Upfront Cost	Fixed cost (e.g., £ 5 for a skin)	Usually lower per attempt (e.g., £ 2.50 per open), however repeated efforts accumulate
Value Certainty	You know precisely what you receive	Random; may get items worth far less or far more than the expense
Danger Profile	Low threat, high certainty	High danger, low certainty
Home entertainment Value	Moderate; satisfaction of getting a wanted item	High; thrill of possible rare pull
Potential ROI	None (unless product appreciates)	Possible (rare product might be resold at greater market value)
