What is the Limbo Casino Game?

At its core, Limbo is a simplified betting game heavily inspired by the principle of the high-low thinking game, integrated with the mechanics of Crash video games. Coming from the cryptocurrency casino sector-- originated by software service providers like Stake and Spribe-- Limbo challenges gamers to anticipate whether an arbitrarily produced multiplier will go beyond a target number set by the gamer.

Unlike standard slots where signs should line up, Limbo deals purely in mathematics and likelihoods. Players set two primary criteria:

1. **The Bet Amount:** How much cash they desire to wager on the round.
2. **The Target Multiplier:** The payment multiplier they are aiming to attain (e.g., 2x, 10x, 100x, and even 1,000,000 x).

Once these are set, the player strikes the "Bet" button. The game generates a random multiplier. If the created multiplier is **equivalent to or greater** than the target multiplier, the gamer wins. If it falls below, the bet is lost.

- **Step 5:** The gamer clicks "Bet," and the random number generator (RNG) immediately produces an outcome.
