In a theoretical, reasonable coin toss in the real world, the possibility of landing on heads or tails is precisely 50% (1 in 2, or £ 1/2 £). If casinos used a true 1:1 payment on a 50/50 game with absolutely no home edge, it would be a break-even game for your home, which breaks the fundamental organization model of gambling.

To maintain an earnings, gambling establishments adjust the payment **Coinflip Gambling** odds or present a little fee.

Feature Fair Coin Toss (Real World) Standard Casino Coin Flip **Likelihood of Heads** 50.00% ~ 49.5% to 50.00% (depending on RNG) **Probability of Tails** 50.00% ~ 49.5% to 50.00% (depending on RNG) **Standard Payout** 2.00 x (Even Money) 1.96 x to 1.98 x (or 2.00 x with a 1-2% home cost) **House Edge** 0.00% Typically 1% to 3%

As revealed in the table above, the house edge is generally baked into the payment structure or taken as a small commission on winning bets.
