Each gamer gets the very same sequence of products, but the circulation of rarity is figured out by the game's random number generator (RNG). The gamer whose overall value of products goes beyond the others takes the entire swimming pool of skins (minus a home cut).

There are numerous common formats:

Format	Description	Typical House Edge
Standard 1v1	Two players open the very same variety of cases; highest overall worth wins.	5-10%
Team Battle	Groups of 2-5 players on each side combine their overalls.	6-12%
Jackpot Battle	The winner takes the entire pot, consisting of all products stopped by all individuals.	8-15%
Speed Run	Players open a set variety of cases in the quickest time; greatest value wins.	5-10%

The "home edge" is the percentage of the total worth that the platform retains as earnings. Comprehending this figure is essential, because it straight affects the expected roi (ROI).

Comprehending the Odds and Expected Value

Every case consists of a predetermined possibility circulation for each rarity tier:

Rarity	Approximate Drop Rate	Common Market Value (GBP)	Consumer Grade (Blue)
~ 80%	£ 0.02	£ 0.10	Mil-Spec (Pink)
~ 15%	£ 0.30	£ 2.00	Restricted (Red)
~ 4%	£ 5.00	£ 30.00	Categorized (Gold)
~ 0.65%	£ 80.00	£ 250.00	Unusual
~ 0.26%	£ 200.00	£ 2,000+	Special Item (Knife/Gloves)
