What is a Coin Flip Casino Game?

At its core, a coin flip game simulates a real-world coin toss. A gamer wagers cash on whether a virtual coin will arrive at "Heads" or "Tails." If the prediction is appropriate, the gamer wins; if incorrect, the home takes the stake.

While the concept sounds identical to banking on the flip of a physical coin with a buddy, online [Bitz.io Coinflip Gambling](#) casinos introduce sophisticated software application, random number generators (RNG), cryptographic confirmation, and adjusted payments to turn an easy play area game into a genuine gambling establishment item.

However, casinos are companies. To ensure success, they present a **home edge**.
