What is CS2 Roulette?

CS2 roulette is a variation of standard gambling establishment roulette, adapted specifically for the Counter-Strike environment. Instead of wagering fiat currency (like GBP or EUR), players deposit CS2 weapon skins, knives, or gloves onto a third-party betting site. The platform worths these items and converts them into site balance or internal "coins."

Once players have balance, they can put bets on a digital roulette wheel. The fundamental mechanics mirror European or American roulette, however the visual and hidden currency are customized entirely to the gaming neighborhood.
