

Ministry of Education Sets Key Dates for Malaysia School Year 2027

The Ministry of Education has finalised the official calendar for the Malaysia school year 2027, outlining major term dates, holiday periods, and the state-grouping system that determines when schools in different regions begin and end their academic sessions. The schedule, which applies to all government and government-aided schools nationwide, is designed to align instructional time, examination periods, and public holidays across the country's diverse state calendars.

Under the 2027 plan, the academic year is divided into two main semesters, each containing two terms. Schools in the northern and southern state groupings will follow slightly different term start dates to account for regional variations in weather and local holidays. The groupings, which have been a feature of Malaysia's education system for several years, allow the ministry to coordinate national assessments while giving states flexibility around their own festive periods.

The first semester for Group A states, which includes Johor, Kedah, Kelantan, Melaka, Negeri Sembilan, Pahang, Perak, Perlis, Penang, Sabah, Sarawak, Selangor, Terengganu, and the Federal Territories of Kuala Lumpur and Putrajaya, is expected to commence in early January 2027. Group B states, comprising Johor, Kedah, Kelantan, Melaka, Negeri Sembilan, Pahang, Perak, Perlis, Penang, Sabah, Sarawak, Selangor, and Terengganu, will begin their first semester later in the month. The precise start dates for each group are published in the official school calendar gazette issued by the Ministry of Education. This staggered approach helps manage teacher deployment and resource allocation during peak enrolment periods.

The [malaysia school year 2027](#) includes several scheduled breaks. The first mid-term holiday is set for March, coinciding with the Chinese New Year period. A longer break in May and June marks the end of the first semester, followed by a two-week mid-year holiday. The second semester begins in June for Group A and July for Group B. The final term runs through to November, with the year-end holidays starting in late November or early December, depending on the state group. Public holidays such as Hari Raya Aidilfitri, Deepavali, and Christmas are factored into the calendar to ensure schools are closed on those days. The ministry also accounts for state-specific holidays, such as the birthday of the Sultan of Kedah or the Harvest Festival in Sabah, by adjusting school closure dates locally.

State groupings and their impact on school operations

The state-grouping system remains a central feature of the Malaysia school year 2027. Group A and Group B designations affect not only start and end dates but also the timing of major

examinations, including the Ujian Pencapaian Sekolah Rendah (UPSR), Pentaksiran Tingkatan Tiga (PT3), and Sijil Pelajaran Malaysia (SPM). By staggering the academic calendar, the ministry can spread the examination load across different periods, reducing pressure on invigilation staff and examination centres. This also allows students in flood-prone states, particularly on the east coast, to complete key assessments before the monsoon season intensifies.

Parents and guardians are advised to check their state's specific school calendar for exact dates. Schools typically distribute a printed calendar at the start of the academic year, and the ministry updates its official portal with any changes. For the 2027 year, the ministry has also introduced a digital calendar tool that syncs with common mobile applications, allowing families to receive reminders about term start dates, holidays, and examination periods.

Holiday schedule and its alignment with national events

The 2027 school holiday schedule is closely tied to the national public holiday calendar. Chinese New Year falls in late January, and the ministry has scheduled the first mid-term holiday to cover the celebration. Hari Raya Aidilfitri is expected in April, and the second mid-term break is positioned around that period. Deepavali occurs in October, and schools in states with significant Indian communities may have an additional holiday. The year-end holidays cover Christmas and the transition into the new year. The ministry has also announced that schools will observe a one-day break for the Awal Muharram and Maulidur Rasul holidays, as per the official list of public holidays for 2027.

For international schools and private institutions that follow the Malaysia school year 2027, the calendar may differ slightly. Those schools are not bound by the Ministry of Education's schedule but often align their terms with the national system to facilitate student transfers and examination entry. Parents enrolling children in such schools should verify the calendar with the individual institution.

Key dates for parents and students

The ministry has released a summary of important dates for the 2027 academic year. These include the first day of school for each group, the start of the first and second semesters, the mid-term and year-end holidays, and the examination periods. Below is a condensed list of the main milestones for Group A and Group B schools:

- First day of school: Group A in early January, Group B in late January
- First mid-term break: late January (Chinese New Year)
- End of first semester: late May

- Second semester begins: June for Group A, July for Group B
- Year-end holidays start: late November for Group A, early December for Group B

The full breakdown of term dates, including the exact start and end dates for each term, is available in the official school calendar document published by the Ministry of Education. Parents are encouraged to refer to that document for planning family holidays and childcare arrangements.

Implications for teachers and school administrators

For teachers and school administrators, the 2027 calendar sets the framework for curriculum planning, assessment scheduling, and leave applications. The ministry has instructed all state education departments to issue the calendar to schools by the end of the current academic year to allow adequate preparation. Teacher training days, known as hari guru, are scheduled during the breaks, and school administrators are expected to allocate those days for professional development and staff meetings. The staggered calendar also affects the recruitment and transfer of teachers, as postings are timed to coincide with the start of each semester.

The Malaysia school year 2027 also includes provisions for schools that need to close for local emergencies, such as floods or haze. The ministry has a standard operating procedure for such closures, which includes making up lost days during scheduled holidays or extending the school year by a few days. Schools are required to notify the district education office and obtain approval before altering the calendar.

About the 2027 school calendar guide

Checksekolah.my provides a guide to the 2027 school calendar in Malaysia, including holidays, term dates, and state groupings by the Ministry of Education. The guide is intended as a reference for parents, students, and educators seeking clear and accurate information about the academic year schedule.
